

# Document Dispatcher

SOLUTIONS

# Document Dispatcher

Sending documents and reports internally or externally to trading partners (customers and vendors) can be a daunting, time-consuming task. Assembling different reports together and sending via email takes a long time. Manual emailing risks sending the wrong documents to the wrong trading partners, with the wrong parameters.

Document Dispatcher allows you to fully automate sending your reports periodically via email, using dynamic parameters, and with no operator intervention! Document Dispatcher does it all for you and frees up your time so you can focus on what matters in your business!

Document Dispatcher

# Document Dispatcher

Document Dispatcher is a simple, affordable automation solution that automates the periodic distribution of documents according to set recurring schedules and dynamic filters. Document Dispatcher is an add-on built on top of Microsoft Dynamics 365 Business Central.

Document Dispatcher is a horizontal solution built by Q Solutions, that takes all of the hassle out of sending the right reports/documents, to the right parties, at the right time!

# WHY Document Dispatcher?

- Do you regularly consume lots of time and resources to prepare and email documents/reports from Microsoft Dynamics 365 Business Central, whether internally or externally?
- Are you behind on collections due to delays in sending invoices to customers?
- Do you sometimes miss running the 'Suggest Vendor Payments' batch job, or any other periodic batch process?
- Do you have trading partners in different time zones? Do you need timely delivery of key documents or reports to those partners?
- Do you need to internally circulate reports to managers and executives based on fixed schedules?
- Do you struggle with scheduling tasks in Microsoft Dynamics 365 Business Central using the Job Queue feature? Do you need a user-friendly scheduling tool that looks and functions like the one in Microsoft Outlook calendars?

# BUSINESS BENEFITS

- Piecing things together in your business communications and streamlining document and report distribution
- Schedule documents on a daily, weekly, monthly and yearly basis, or with custom recurrence
- Have documents automatically emailed to the right parties and with the right parameters – with no operator intervention needed
- Save time, efforts and resources
- Leverage more power out of Microsoft Dynamics 365 Business Central and increase your automation levels, so you can focus on what matters
